Objective

Aspiring Full Stack Developer skilled in MERN stack, aiming to build efficient, secure, and user-focused applications in a growth-oriented environment.

Education

Indian Institute of Technology , Bhilai

Bachelor of Technology in Electrical Engineering

CGPA - 9.10

Aug 2023 - present

Coursework

- Data Structures & Algorithms
- Computer Networks
- Machine Learning
- Operating Systems
- Database Management Systems
- Artificial Intelligence

Experience

Evoastra

Sep 2025 – Nov 2025

Data Scientist Intern

- Developed an ML model achieving 97% accuracy on telecom customer churn based on 15 years of historical data.
- Performed data cleaning, exploratory data analysis, and model development, improving data quality and model performance.

IBM CSRBOX

June 2024 – July 2024

AIML Intern

- Developed a chatbot **AQUAGURU** to address crucial issues related to clean water and sanitation.
- Incorporated scripts using Python, WatsonX Assistant, and advanced data analytics to answer user queries.

Projects

SAHAYATRI | MERN stack

in progress

- Implemented secure user authentication using JWT and protected routes for personalized travel experiences
- Built a responsive React-based UI and a scalable backend using Node.js, Express, and MongoDB
- Developed journey guidance features including route exploration, destination insights, and user-specific recommendations to assist travelers in real time.

PlantNetra | Machine Learning , MERN , Android Studio

In Progress

- Built a full-stack smart application using the MERN stack and converted it into a cross-platform mobile app
- Architected an efficient ML pipeline with 5 trained models (99% accuracy) for real-time disease prediction, optimized for low-latency inference and seamless integration with the application layer.
- Implemented key features including real-time leaf disease detection via image upload, instant prediction results, intuitive mobile UI, and scalable backend API integration.

Expense Tracker | MERN Stack

GitHub

- Implemented secure authentication using JWT tokens and bcrypt for safe and encrypted user access.
- Designed category-wise interfaces for Income, Expense, Download, Addition, and Deletion workflows.
- Built a fully responsive UI enabling seamless financial tracking across devices.

Zombie Survivor | Python, Pygame, AI Simulation

GitHub

- Developed a modular Pygame setup supporting smooth real-time visualization and AI experimentation.
- Implemented A* pathfinding for human and zombie agents, enabling dynamic and intelligent chase behavior.
- Designed a randomized yet solvable grid system with obstacles, zombies, and a safe zone each run.

Technical Skills

Programming: C, C++, Java , Python

Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js , TypeScript , TailwindCSS

Data Analysis : Excel, Python, SQL, Pandas, NumPy, Matplotlib, Seaborn

Databases: MySQL, MongoDB

Tools & Technologies: GitHub, Linux, VS Code, Android Studio , TRAE,Jupyter Notebook, Anaconda, LaTeX

Soft Skills: Communication, Problem Solving, Teamwork, Adaptability, Leadership

Leadership / Extracurricular

Inter IIT Head | Sports Council, IIT Bhilai

CoSA 2025–26

Prayatna 7.0 Co-Convenor | Sports Council, IIT Bhilai

CoSA 2024–25

Inter IIT Meet | Annual inter-IIT sports and talent showcase

- Represented IIT Bhilai Volleyball team at the 57th Inter IIT Sports Meet at IIT Kanpur.
- Represented IIT Bhilai Volleyball & Athletics team at the 58th Inter IIT Sports Meet at IIT Hyderabad.
